

The Talk of the Town

Brought to you by the Pequannock Township Health Department
Serving Bloomingdale, the Town of Boonton, Florham Park, Kinnelon, Pequannock and Riverdale

THE BERRRR MONTHS

COLD & FLU¹

It's that time of year again. The sneezing, stuffy noses, piles of tissues, chapped lips, etc. are all back. Both the common cold and the flu are viruses that have a big impact, but you may be wondering, "what's the difference?"

The common cold is caused by all different viruses and usually has a gradual onset of symptoms. Those symptoms can include, but are not limited to, fatigue, a stuffy nose, sneezing, sore throat and a cough. Always consult with a healthcare provider, but most colds can be easily treated with over the counter medication and some rest and relaxation.

On the flip side, there is the flu. The flu, otherwise known as influenza, is caused by only one type of virus, the influenza virus. This virus is known to have a more abrupt onset of symptoms. These symptoms can include, but are not limited to, fever, aches, pains, chills, cough, and headache. The flu can lead to more serious complications if not addressed properly and that is why getting an annual flu shot and seeing a healthcare provider if you suspect the flu is so important.

It's important to mention that in our cold & flu season, another virus with similar symptoms, COVID-19 is also a possible illness that can introduce itself. Not sure which is which? Consult with a healthcare provider whenever you're feeling down this cold and flu season!

WINTER PREPARATION²

Grab the sled or the shovel, it's time to prep for the winter months! Winter preparation should include your home, vehicle(s), travel plans, and emergencies. Winterizing the home can entail adding extra insulation to windows, getting on a ladder (if able) and cleaning the gutters, double checking the heating system, and/or making sure there is a properly working carbon monoxide detector. By doing this home can be a safe and cozy place all winter!

When was the last time you got a full service on your vehicle(s)? Or checked the tread on the tires? Along with this, keep your fuel tank full to prevent ice build up in fuel lines and put winter-mix windshield wiper fluid in for a clear drive. This way your vehicle(s) are ready to go for any travel plans you may have.

As much as you try to prevent it, there is always a chance for an emergency. Create an emergency kit and plan with whomever you live with. By doing this and keeping a food reserve that is shelf stable in the dwelling, you will be better prepared for whatever emergency comes your way.

HEALTHY RECIPES FOR RECIPIENTS

SPICY VEGETABLE SOUP

INGREDIENTS

- 2 tbsp extra-virgin olive oil
- 1 large onion, diced
- 1-3 tsp hot paprika (to taste)
- 2, 14 oz cans of vegetable broth
- 4 medium tomatoes, diced
- 1 medium yellow squash, diced
- 2 cups diced cooked potatoes
- 1 1/2 cups green beans, cut in 2 inch pieces
- 2 cups frozen spinach
- 2 tbsp sherry vinegar or red-wine vinegar
- 1/4 cup chopped fresh basil

DIRECTIONS

1. Heat oil in a Dutch oven over medium heat.
2. Add onion, cover and cook, stirring occasionally until they start to brown (about 6 minutes).
3. Add paprika and stir to combine. Cook for about 30 seconds.
4. Add broth, tomatoes, squash, potatoes, and beans. Bring to a boil.
5. Reduce heat to a simmer and cook, stirring occasionally, until the vegetables are tender, roughly 12 minutes. Stir in spinach and vinegar and continue to cook until heated through.
6. Ladle soup into bowls and top with fresh basil.
7. Enjoy!

CROSSWORD

ACROSS

6. Proper name for the flu
8. Sound made by sneezing
10. What needs to have the leaves cleaned out in preparation for winter
11. Comes in a box and helps wipe your nose
12. What the recipe in this issue makes

UPDATES & RESOURCES

HMPV & RSV^{3,4}

Human metapneumovirus (HMPV) is a upper and lower respiratory disease that has recently been in the lime light. It causes cough, fever, nasal congestion, and shortness of breath. Similarly, RSV can cause runny nose, decrease in appetite, coughing, sneezing, fever and more. Both are known to afflict younger children, elderly adults, and those who are immunocompromised. Similar, but not the same, RSV is preventable by vaccine whereas HMPV is not.

NJ SCHOOL VACCINATION⁵

Back to school time can be hectic, but it's important to remember that getting the proper vaccinations is just as important as the decision about what backpack to buy. DTaP/Tdap, IPV, MMR, Varicella, Hep B, Meningococcal are a few to know about. Make sure to get your flu shot annually and always consult with your health care provider on what children need based on their age. Learn more by going to [source 5](#).
