June 9, 2016

To the Residents of Star Lake Road:

The Water, Drainage and Paving Reconstruction project will commence on or about Thursday June 16, 2016 at 8:00 am. There will be limited access to residence homes during the work day/week. Expect delays and access on the street from 8:00 am till 5:00 pm. Access will be limited during the day and may inhibit entering/leaving your property when work is being performed near your property. There will be periods of interruption of the water services when the improvements to your particular property are being constructed. We will make every effort to keep these inconveniences to a minimum, and our crews will be sensitive to any special circumstances that may be needed if you could please contact our office or on site supervision so we may adjust accordingly. There will always be emergency service access.

We apologize for any inconvenience during the process but appreciate your help in understanding the more cooperation we can achieve the sooner we will be completed.

All access will be open after approximately 5:00 pm daily
